RE: Notice of Completion of Removal Action at the Flyway Property

Dear Bob:

Pursuant to Section XXVII of the Administrative Order on Consent for Removal Action ("the AOC"), CERCLA Docket No. CERCLA-08-2003-0011, this letter serves as the Notice of Completion for the Removal Action conducted by W.R. Grace at the Flyway Property, part of Operable Unit 2 (OU2), at the Libby Asbestos Site in Libby, MT. W.R. Grace and its contractors have completed the Work required by the AOC and associated work plans. However, W.R. Grace may have continuing obligations under the AOC, such as payment of EPA's response costs and record retention. EPA's contractors provided oversight of the work during the Removal Action. EPA considers installation and maintenance of the perimeter fencing sufficient post-removal site control.

Some future work remains at OU2. During 2005, EPA intends to conduct removal actions in two locations near the Flyway property: the Highway 37 Right of Way adjacent to the Flyway, and the Wise property contiguous the Flyway. Upon completion of these cleanups, all anticipated removal actions at OU2 will be complete. However, future remedial action may be necessary at OU2, including the Flyway property, to ensure the long-term protection of human health and the environment.

We appreciate your cooperation and work on this Removal Action. If you have any questions, please contact me at (303) 312-6748. We hope to continue to work productively with W.R. Grace, where appropriate, on future Libby investigation and cleanup.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Christiansen".
